

Grade 3 Mathematics

Pupils' Class Note

Week 1: Number Sense and Place Value

Basic 3 / Grade 3 | Age: 6–8 years

Topic: Counting, Reading and Writing Numbers up to 1,000

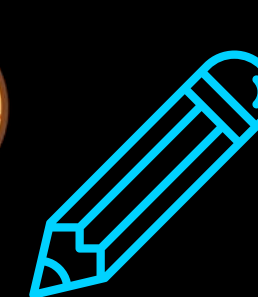

★ What I Will Learn Today!

Digit Position in a Number
I can tell which position a digit is in a number: Hundreds, Tens or Units /Ones.

Reading & Writing Numbers
I can read and write numbers up to 1,000 in figures and in words.

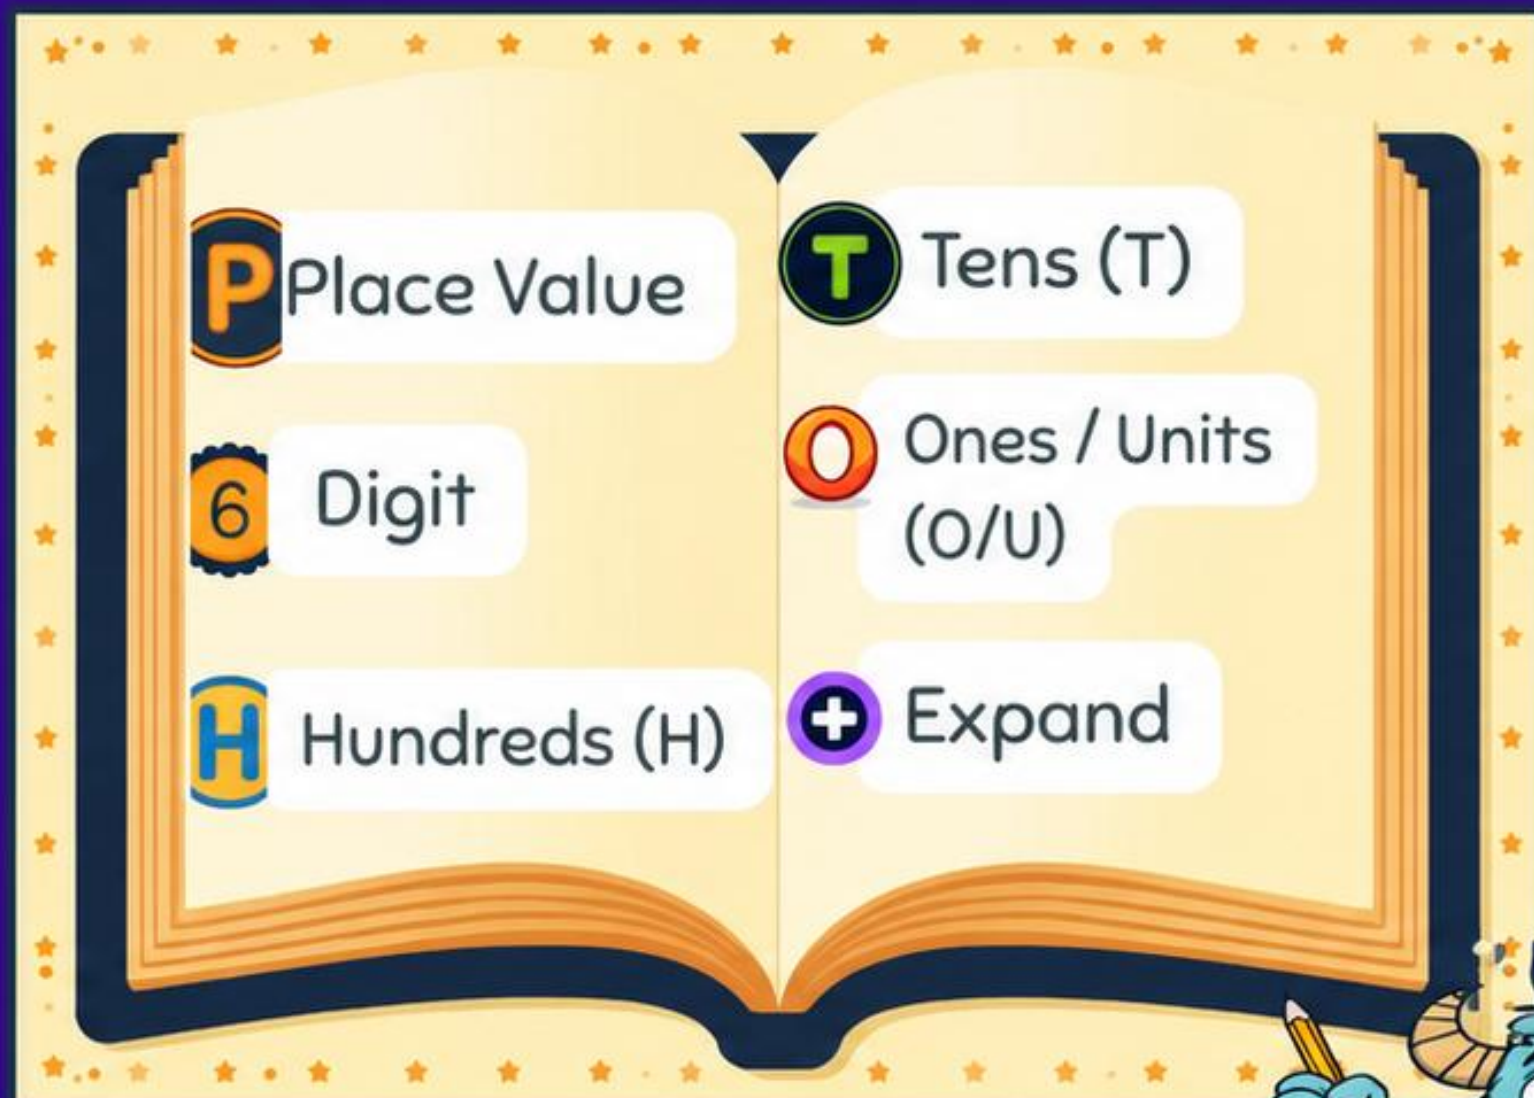

Expanding Numbers

I can break (expand) a number into hundreds, tens and ones.

New Words for Today

M1. Shanon Words

Place Value : The value of a digit based on its position.

Digit : A single number from 0 to 9.

Hundreds (H) : The third place from the right.

Tens (T) : The second place from the right.

Ones / Units (O/U) : The first place from the right.

Expand : To write a number as the sum of the values of its digits.

Place Values
(Hundreds, Tens, Ones)
in a Number

H	T	U

PLACE VALUE

This position of a digit in a number and what it is worth — the same digit can mean something different depending on where it sits.

Example: In 111, the '1' in the yellow card is in the Hundreds position, so it's worth 100 (not just as 1 in the purple card)

Place Value Chart

Hundreds

Tens

Ones

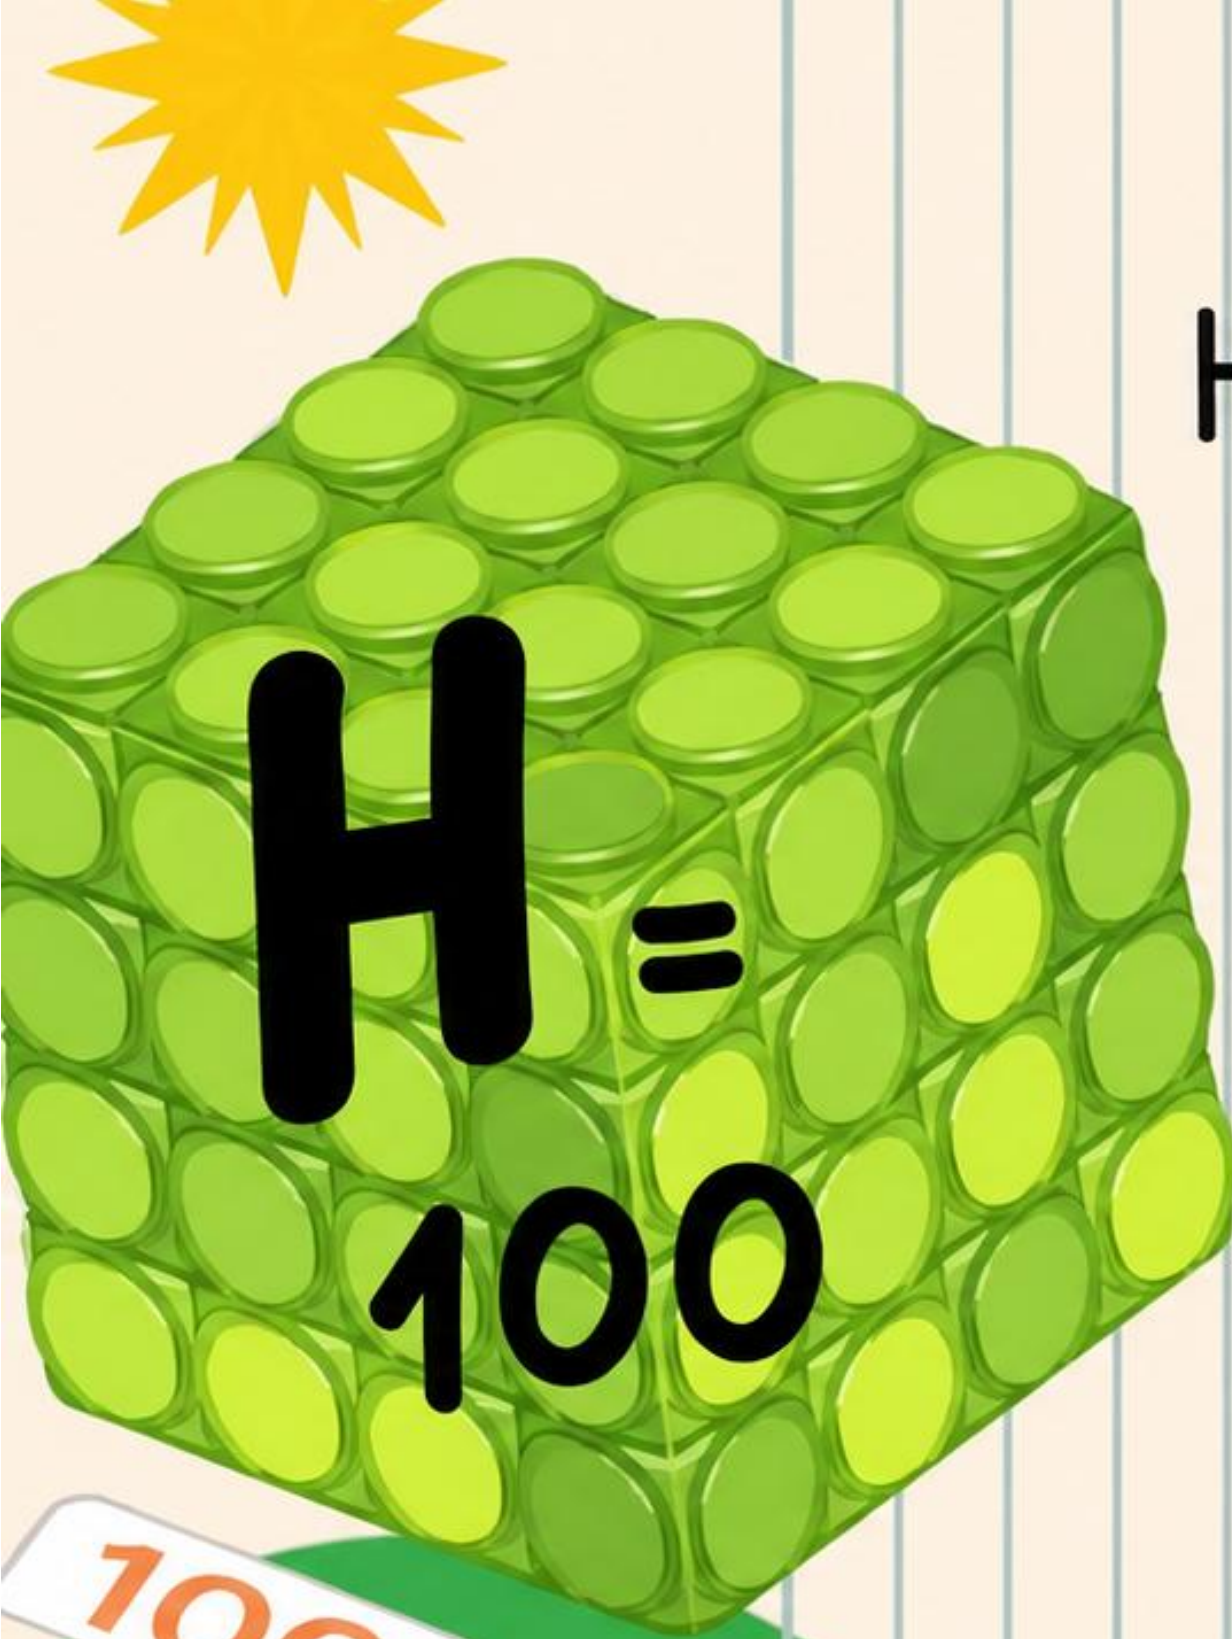

DIGIT

Any one of the numbers 0–9 used to write a number or bigger numbers — like a building block for bigger numbers.

Example: 125 has three digits
1, 2, and 5.

Hundreds (H)

A group of 100 is called one hundred (1 hundred).
Hundreds are written with two zeros.
(00)

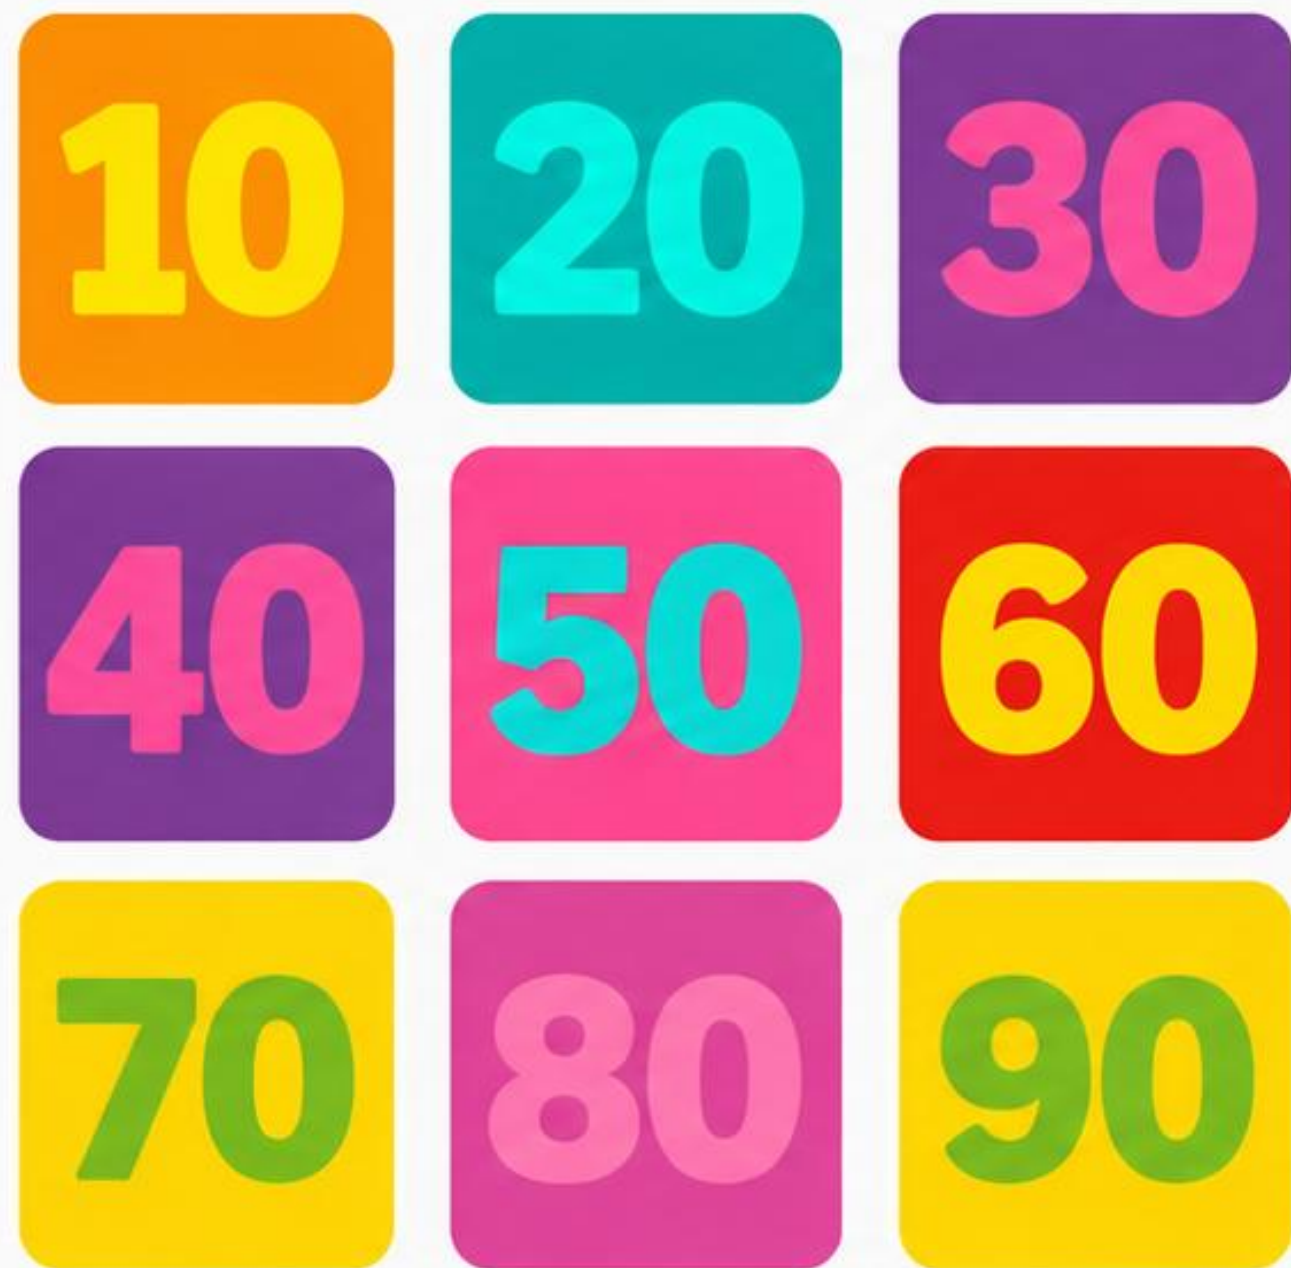

100

These are all
hundreds

Each number has
two zeros

Tens (T)

10

What is a Ten?

A group of 10 is called one ten (1 ten). Tens are written with one zero at the end.

20

Tens Number Examples

10, 20, 30, 40, 50, 60, 70, 80, 90 — These are all TENS

30

Remember This!

Each number has one zero.
Tens always end in 0!

Ones / Units (O/U)

A single item is called one unit (1 unit). Ones (units) are written without a zero.

These are all ones (units). None of these numbers has a zero.

1	2	3
4	5	6
7	8	9

$$125 = 100 + 20 + 5$$

Expanded Form

Expanded form means breaking a number into **hundreds**, **tens**, and **units/ones** to show the value of each digit.

Warm -up

Identify these numbers:

a. 40

b. 5

c. 1

d. 45

Place Value: Ones, Tens, Hundreds

3rd

H

1

1

hundred

100

2nd

T

2

2

tens

20

1st

U

5

5

units

5

Left Side

Right Side

(00)

(0)

Step 1: Ones/Units and Tens

1. What is 5 tens?

2. What is 8 tens?

3. 1 ten has how many zeros?

4. $41 = \underline{\quad}$ tens and $\underline{\quad}$ one

Step 2: Hundreds in a Place Value Table

1. A hundred has how many zeros?
2. What does H stand for?
3. What does T stand for?
4. What does U stand for?

Step 3: Reading Numbers

Identify these numbers:

a. 98

b. 25

c. 10

Step 4: Writing Numbers in Figures

Identify these numbers in figures

Ninety-eight

Twelve

One

Step 5: Expanding Numbers

What does "expand" mean?

Quick Recap (All Steps)

1. What is place value?
2. What does H stand for?
3. What does T stand for?
4. What does U stand for?
5. How many zeros are in 100?
